

100ah power station in China in Sao-Paulo

Overview

Why are China's power stations important?

China's power stations are a cornerstone of the nation's rapid industrialization and economic growth. As the world's largest energy consumer, understanding the intricacies of China's power generation landscape is crucial.

Can Chinese UHV transmission technology help Brazil build an electric highway?

Aerial view of the Estreito Converter Station, Phase I of the Belo Monte UHV DC transmission project [Photo/sasac.gov.cn] In recent years, Chinese UHV transmission technology has helped Brazil build an "electric highway", becoming a brilliant example of promoting green development under the Belt and Road Initiative.

Who makes the most electric cars in Brazil?

Figures from the Brazilian Electric Vehicle Association (ABVE) show that Chinese brands accounted for 63.5% of electric vehicle sales in the country, led by BYD, which holds 28.10% of the hybrid segment and a dominant 76.78% share among fully electric cars.

How will Brazil's solar power project work?

"The project will consolidate and transmit wind, solar, and hydro energy from Northeast and Northern Brazil to meet the electricity needs of approximately 12 million people in key areas like the capital Brasília," said Zhang Zhe, deputy director of market development at State Grid International Development Co., Ltd.
