

25mw energy storage device

Overview

What is gravity energy storage system (GESS)?

The 25 MW/100 MWh EVx™ Gravity Energy Storage System (GESS) is a 4-hour duration project being built outside of Shanghai in Rudong, Jiangsu Province, China. The EVx™ is under construction directly adjacent to a wind farm and national grid.

How does The EVX gravity storage system work?

The EVx gravity storage system works by raising and lowering concrete blocks to store and release potential energy, and will store 100MWh of energy, which it can deliver at 25MW.

Could gravity storage help balance a wind farm's electricity output?

Switzerland-based Energy Vault says it has built a large gravity storage installation in China which will help balance the electrical output of a wind farm, and it is now being "commissioned" before connection to the grid.

How efficient is The EVX TM Energy Storage System?

The EVx™ system is projected to achieve an impressive round-trip efficiency exceeding 80%. This places the new gravity system at the forefront of energy storage efficiency compared to alternative long duration energy storage methods such as mechanical, thermodynamic, compressed air, and flow battery systems.
