

6V 3 6W solar panel

Overview

What is a 6 volt solar panel?

WSL Solar's 6V solar panels are built with the latest most efficient crystalline silicon solar cells or super high efficiency Sunpower solar cells. These 6 volt solar panels are great for charging your 3.7V DC batteries and ideal for use in off grid applications such as GPS tracking, educational kits, small electronic devices, LED lighting etc.

What is a 6 volt solar panel 3W?

21% efficiency. WSL Solar's 6 Volt solar panel 3W is built with the latest PERC monocrystalline solar cell. It is laminated by tempered glass, which is durable and robust. This custom solar panel is ideal for use in off grid applications such as solar powered LED lighting, IoT solar, solar traffic sign, small solar powered system etc.

How much power does a 6.6kW solar panel produce?

A 6.6kW solar panel can produce approximately 24 kWh in favorable climate and weather conditions. A 6.6kW solar system is an energy-efficient option that could comfortably satisfy the needs of an average Australian home. However, power generation can vary as it depends on multiple factors, such as the type of solar system to install.

How many Ma does a 3W panel output?

They output 6V at 930 mA via 3.5mm x 1.1mm DC jack connector - a nice upgrade to the 2W or 3W panels we have been carrying. The substrate is an aluminum / plastic composite, specifically designed to be strong and lightweight. They can easily stand up to typical outdoor use including being dropped and leaned on.
