

A German chemical plant uses a 120kW folding container

Overview

What is a solarcontainer?

Solarcontainer explained: What are mobile solar systems?

The Solarcontainer represents a grid-independent solution as a mobile solar plant. Especially in remote areas it can guarantee a stable energy supply or support or almost replace a public grid with strong power fluctuations, as well as diesel generators that are used.

What is a special container & how does it work?

The special container only functions as a transport, packaging and security unit for the largely pre-assembled photovoltaic system. In this way, the shell of the solar panels is completely unfolded.

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

A German chemical plant uses a 120kW folding container

[Containerized Photovoltaic Power Plant ...](#)

In a nutshell, folding PV panel containers overcome traditional fixed solar panel limitations of mobility and efficiency by incorporating modern photovoltaic technology with innovative design to offer a new energy ...
