

Accelerate the construction of energy storage projects

Overview

Will pumped storage projects be accelerated during the 14th five-year plan?

On April 2, 2022, the National Development and Reform Commission and the Energy Administration jointly issued a notice to accelerate the development and construction of pumped storage projects during the 14th Five-Year Plan period.

How to promote the construction of pumped storage power stations?

To promote the construction of pumped storage power stations, it is of great significance for the construction and optimization of modern power systems.

2. Development trends of pumped storage energy in China To effectively support the construction and development of pumped storage power stations, China has issued a series of supporting policies.

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

How pumped storage and new energy storage are developing in central China?

The development of pumped storage and new energy storage in Central China shows a trend of coexistence and complementarity, which is mainly due to the great importance of energy structure optimization and power system regulation capacity in the region.

Accelerate the construction of energy storage projects

The National Development and Reform Commission and the National Energy

New Energy> The National Development and Reform Commission and the National Energy Administration have deployed to accelerate the development and construction of pumped ...
