

# Amsterdam offshore solar project with energy storage

## Overview

---

Why is Amsterdam launching a floating solar farm?

The Port of Amsterdam has received the first floating solar units for an offshore solar farm. These solar units will soon integrate with existing wind farms, forming one of the world's largest offshore solar projects and highlighting Amsterdam's leadership in sustainable energy.

Is the Netherlands launching the first offshore solar farm?

The Netherlands is launching the first offshore solar farm that works with wind. It will be tested and could mark a major step in clean energy.

Is a solar farm ready for offshore installation?

The assembly of the offshore solar farm has been successfully completed at the Port of Amsterdam, and the system is ready for offshore installation. The system, supplied and built by Oceans of Energy, is larger than a football field and is set to integrate power supply at the Hollandse Kust Noord offshore wind farm in Summer 2025.

What is the world's first offshore solar farm?

What is described as the "world's first" offshore solar farm integrated within a wind farm has completed assembly at the Port of Amsterdam and is ready for deployment at the Hollandse Kust Noord (HKN) offshore wind farm in the North Sea. Dutch company Oceans of Energy assembled the floating solar farm in three days.
