

Angola Rainproof Power Station Generator BESS

Overview

How will the cassaque project improve living conditions in Luanda?

The Cassaque project will improve living conditions for the people of Luanda, ensuring a more regular supply of clean water. Water supplied by the Cassaque pumping station accounts for 60% of treated water for public consumption in Luanda. ANGOLA POWER PLANT.

How many transformers were installed in Angola power plant?

ANGOLA POWER PLANT. HIMOINSA. Step-up transformers. Transformers with biodegradable coolant have been installed. Each transformer contains a temperature and pressure detection system. In total, nine 1600kVA and nine 2000kVA transformers were installed, with a transformation ratio of 15/0.4 kV/ 50 Hz.

What is the cassaque pumping station project?

The main objective of the project is the construction and start up of a substation to supply power to the Cassaque pumping station. This will provide a supply of good quality water to the town of Zango IV. The project is designed to generate 25MW PRP and deliver 20MW of continuous power to the grid, with 15,000 volts at 50 Hz.

How much power will the cassaque plant provide?

This will provide a supply of good quality water to the town of Zango IV. The project is designed to generate 25MW PRP and deliver 20MW of continuous power to the grid, with 15,000 volts at 50 Hz. SOLUTION The Cassaque plant has installed capacity of 40MW, however, guaranteed capacity stands at 25MW.
