Argentina solar solar container lithium battery group

Overview

Will Argentina start a lithium battery factory in Latin America?

(Image: Mariano Garcia / Alamy) Argentina will start operations at the first lithium battery cell factory in Latin America before the end of the year. The country aims to boost its position in the region's electric transport and energy storage markets, and go beyond simply producing the lithium that is critical to their growth.

Who is Argentina Lithium & Energy Corp?

Argentina Lithium & Energy Corp is focused on acquiring high quality lithium projects in Argentina and advancing them towards production in order to meet the growing global demand from the battery sector.

Could a new lithium plant add value to Argentina's lithium industry?

A worker at a lithium plant in the Salinas Grandes salt flat in northern Argentina. The country's lithium production is rising, and a new battery plant will be one of the first facilities to process the metal domestically, with hopes of adding value to its industry. What is happening in Argentina's lithium carbonate production capacity?

Argentina's lithium carbonate production capacity has already tripled in the last two years. Around 85 projects are currently at various stages of development in northwestern Argentina, ranging from basic exploration to infrastructure building.
