

# **Baku Solar Street Light solar container power supply system**

## Overview

---

What is a solar street light system?

A solar street lamp system is a lighting system for the illumination of streets, roads, squares, and common public areas. It uses the sun's light to work. solar powered street light is the complete set of Solar Panel, Lithium Battery, Light, Charge Controller & Poles. There are two designs split solar street light and integrated solar street light.

Who makes solar street lights in China?

ZGSM is the top manufacturer, factory, and supplier of solar powered street lights in china since 2005. We can help you win the bidding or markets by the following point: According to the sunshine conditions of your city, working time, regular weather, our technical team will customize a solar street light system that meets the local for you.

What battery does a solar street light use?

Integrated solar street light usually use lithium battery as energy storage. Lithium battery are divided into ternary lithium batteries and lithium iron phosphate batteries (LiFePo4 batteries), Lithium battery is a key component in solar street lights, and the cost is also the highest.

Are zgsm rifle system solar powered street lights suitable for project use?

ZGSM's Rifle system solar powered street lights are very suitable for project use, especially in areas with underdeveloped power grids and sufficient solar energy.
