# Battery Energy Storage Investment Company

## Overview

---

Why should you invest in battery storage?

The battery storage sector stands at the nexus of global energy transition, presenting a compelling investment opportunity driven by an accelerating shift to renewables, surging electricity demand from new industrial loads, and supportive policy frameworks worldwide.

Where will a new battery energy storage system be installed in Australia?

The new system was designed in collaboration with Private Energy Partners, a Quinbrook affiliate. It will be deployed at multiple sites across Australia. These include Brisbane's Supernode, the country's largest battery energy storage campus.

Will a battery storage system help power data centers?

Those storage systems, which will use cheaper lithium iron phosphate batteries, will be used to power data centers and help buffer demand on the electric grid. Ford says the battery storage systems will start shipping in 2027 and that the company plans to build 20GWh of annual capacity.

Where can you store battery energy in Brisbane?

These include Brisbane's Supernode, the country's largest battery energy storage campus. Other locations include industrial hubs in Gladstone and the Lansdown Eco-Industrial Precinct in Townsville. The goal is to provide industrial users with a reliable method for running two full 8-hour shifts using only solar power.
