

# Battery cabinet automatic feeding device

## Overview

---

With the continuous development of the poultry breeding industry to large-scale and mechanization, how to feed poultry faster and more efficiently has become an urgent problem to be solved. The traditional a.

Which automatic feeding system is suitable for automatic battery cage poultry farms?

FAMtech manufactures and sells fully automatic feeding systems suitable for automatic battery cage poultry farms. Our automatic feeding system consists of three types, which can be applied to our various cage solutions according to the needs of customers. Place of origin: Henan Province, China.

What are the components of automatic chicken feeding system?

The automatic chicken feeding system is mainly composed of the frame, the traveling power output system, the traveling system, the blanking system, the feed quantity regulation system, and the power distribution system. The frame is welded with high-quality rectangular steel.

What is famtech automatic chicken feeding system?

FAMtech automatic chicken feeding system is a piece of cage-mounted feeding equipment. It is a supporting device specially designed for the multi-tier battery cage system. Driven by electricity, it can achieve automatic reclaiming and automatic feeding. Usually, a row of chicken cages needs to be equipped with an automatic feeder.

Why is the automatic battery cage system important?

The design of the cages in the Automatic Battery Cage System is a critical factor in creating a healthy and productive environment for poultry. The space between tiers ensures proper ventilation, reducing the risk of disease transmission through the manure.
