

# Bis solar inverter in Brno Czech Republic

## Overview

---

How is the solar industry growing in Czech Republic?

In Czech Republic, in particular, the solar industry is experiencing a massive growth period. There are more households and businesses that have installed solar roof panels. Czech Republic held a 19% share in renewable energy for electricity generation. They are expected to increase the share to 22% by 2030.

Where are solar inverters located?

Microinverters are located on the roof near the solar panels, due to which these inverters are more efficient than string inverters when it comes to converting energy. Solar systems with microinverters can still generate electricity, even if one or two panels do not perform properly.

Where can I buy solar panels?

SOLSOL has been your reliable partner in solar energy since 2012. All orders are subject to the General Terms and Conditions. Copyright © 1996-2023, SOLSOL s.r.o. Buy photovoltaic panels, inverters, batteries, BESS and PV structures directly from SOLSOL. Professional B2B e-shop for partners with quick and easy ordering.

What is a microinverter solar system?

Typically, microinverters are “distributed” inverters. Solar PV systems with microinverters have a small inverter installed for each individual solar panel. Instead of sending energy from every panel to a single inverter, microinverters convert the DC energy to AC energy on the roof itself.
