# Cambodia Solar Power Inverter

## Overview

---

Is solar energy a good investment in Cambodia?

According to the International Renewable Energy Agency (IREA), access to solar energy in Cambodia is 11 times higher than it was just a few years ago. Approximately one third of a million households, or 8.4% of overall Cambodia households, are benefiting from off-grid or micro-grid solar (Cambodia Socio-Economic Survey).

How many solar PV projects are there in Cambodia?

Scores of seven solar photovoltaic (PV) projects are in the pipeline for construction and planned for operation by 2023. The Cambodian government aims to generate 20 percent of energy from renewable energy. This is our guide to Solar Energy in Cambodia.

Is solar power transforming remote communities in Cambodia?

Solar power is transforming remote communities in Cambodia with affordable, renewable energy and the chance to live more productive lives. However, hundreds of other villages remain off the grid, and energy experts say Cambodia should be doing more to harness the country's immense amount of untapped sunlight.

Are solar power projects affecting Cambodia's energy mix?

Currently, solar power projects are contributing to less than 1% to the energy mix in Cambodia, but there are plans in place to expand on that. A 60MW solar-panel plant in Kampong Speu province went live in April this year, four months ahead of schedule. It sits in addition to a 10MW solar plant that is already connected to the grid.
