Can Bulgarian solar modules be exported

Overview

How many solar projects are there in Bulgaria?

Currently, Bulgaria operates over 800 megawatts of wind projects. Bulgaria has an annual average of 2,100 hours of solar irradiation. As of 2023 over 1,700 megawatts project are operational in Bulgaria and it is growing substantially. Geothermal energy is gaining attention, with legislative proposals to harness Bulgaria's geothermal potential.

How much electricity did Bulgaria import in 2022?

Bulgaria exported 11,639 gigawatt hours but imported 1,154 gigawatt hours of electricity in 2022. The National Recovery and Resilience Plan (' NRRP ') of Bulgaria aims to decommission thermal capacity and invest in renewables, targeting 30,33% renewable energy by 2030.

Why is energy storage important in Bulgaria?

In 2023, the Bulgarian Parliament introduced specific legislative amendments regulating the electricity storage. The rationale behind the amendments is to provide balance and flexibility to the power system. Energy storage is a crucial step for low-carbon economy since it enhances the security of supply and the development of renewables capacity.

How regulated is Bulgaria's electricity transmission & distribution?

Introduction to renewables sector Bulgaria's electricity transmission and distribution remains highly regulated.
