

# Central Asia develops energy storage projects

## Overview

---

### What is Uzbekistan's First Energy Storage Project?

Installed with Sungrow's cutting-edge liquid-cooled ESS PowerTitan 2.0, this facility marks Uzbekistan's first energy storage project and stands as the largest of its kind in Central Asia. The project will play a pivotal role in driving the region's energy transition forward and setting a sustainable precedent.

### Can energy storage solve transboundary water and energy conflict in Central Asia?

A solution for transboundary water and energy conflict in Central Asia is proposed. Benefits of energy storage beyond the energy sector are shown. Long duration energy storage is key for high shares of solar PV and wind energy in the region. An open-access, integrated water and energy system model of Central Asia is developed.

### Does Central Asia have an integrated water and energy system?

An open-access, integrated water and energy system model of Central Asia is developed. Central Asia's energy transition to a high share of renewable energy by 2050 is analyzed. Model for Energy Supply Systems Alternatives and their General Environmental Impact 1. Introduction.

### What is Central Asia's electricity generation mix from 2020 to 2050?

Central Asia's electricity generation mix from 2020 to 2050. Assuming a high-renewable energy scenario with 66% of renewable electricity by 2050. The share of solar PV increases from 2% in 2020 to 34% of total electricity generation by 2050, and natural gas and coal generated electricity combined reduces from 73% in 2020 to 34% in 2050. Fig. 7.
