

Cuba s earthquake high altitude solar container communication station wind power

Overview

How many MW will Cuba add to the national energy system?

This will add 1,200 MW to the National Electroenergetic System (SEN). Cuban authorities also informed the recovery of 22 wind power generators that are part of the wind farm located in the province of Las Tunas, which will contribute 33 MW to the national system. However, 11 more engines remain to be restored.

Will Cuba get more solar energy by 2030?

By 2030, the country aims to generate more than a third of its electricity from solar parks and other renewable sources. Cuba on Friday unveiled a new solar energy park in the capital Havana, part of an ambitious project to alleviate the communist island's increasingly desperate struggle with power blackouts.

What is Cuba doing to increase energy supply?

On Tuesday, Cuban authorities announced that the administration of President Miguel Diaz-Canel has devised a strategy to increase energy supply through the use of renewable energy, the installation of new power plants, and the repair of existing infrastructure.

What happened to Cuba's power grid?

It's been a rough year for Cuba. The island nation has suffered through a series of powerful storms, including two recent hurricanes that knocked out its power grid. And now, Cuba was hit with a 6.8 magnitude earthquake just off its southern coast Sunday, near the town of Bartolomé Masó in Granma Province.
