

# **Current status of wind power construction at Buenos Aires solar container communication stations**

## Overview

---

What percentage of Argentina's electricity is generated by wind?

Wind power accounted for 8% of Argentina's total installed power generation capacity and 10% of total power generation in 2023.

Is the southwest of Buenos Aires a key pillar in wind energy?

The Southwest of Buenos Aires remains a key pillar in wind energy. The Southwest of Buenos Aires continues to be a key player in wind energy, hosting 18 out of the 69 wind farms across the country. In October 2024, these projects injected 330 GWh of electricity, equivalent to 23.1% of the total renewable energy nationwide.

How many wind farms are there in Buenos Aires?

As of October 2024, Buenos Aires had 26 wind farms, surpassed only by the Patagonian region with 28 projects. With 18 ventures in our area, the region contributes one out of every four parks in the country and injects 23.1% of the total renewable energy.

What is the wind power market in Argentina?

According to GlobalData, wind power accounted for 8% of Argentina's total installed power generation capacity and 10% of total power generation in 2023. GlobalData uses proprietary data and analytics to provide a complete picture of this market in its Argentina Wind power Analysis: Market Outlook to 2035 report. [Buy the report here.](#)
