

# **Delivery period for bidirectional charging of Swiss photovoltaic energy storage containers**

## Overview

---

What is a bi-directional charging system?

This shift is made possible by the cutting-edge bi-directional charging technology. Bi-directional charging allows EVs to function as mobile energy storage units. Equipped with this technology, EVs can not only draw power from the grid but also return electricity to it, or supply power to homes during peak demand or in the event of blackouts.

How can bidirectional charging/discharging a battery achieve maximum PV power utilization?

In addition, with the proposed strategies, the bidirectional charging/discharging capability of the battery is able to achieve the maximum PV power utilization. All the proposed strategies can be realized by the digital signal processor without adding any additional circuit, component, and communication mechanism.

Can bi-directional charging be a Mainstream Energy Solution?

Sigenergy is proud to be among the first to successfully implement bi-directional charging in a commercial setting. In partnership with NIO, a leading EV manufacturer in China, Sigenergy has demonstrated the viability of bi-directional charging as a mainstream energy solution.

Does sigenergy offer bi-directional charging in the evdc?

While both the EVAC and EVDC provide crucial benefits to EV owners, Sigenergy has taken a bold step forward with the introduction of bi-directional charging in the EVDC, setting a new industry standard.

## Delivery period for bidirectional charging of Swiss photovoltaic ene

### [Bidirectional charging: Is Switzerland ready?\\_ Mobility](#)

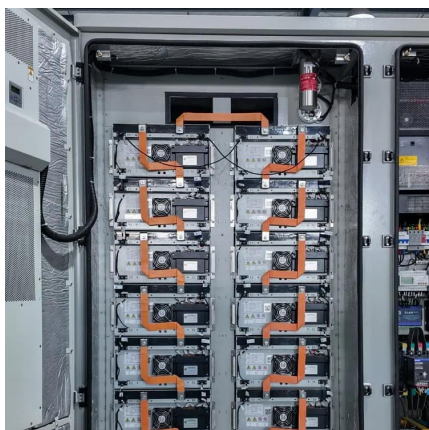

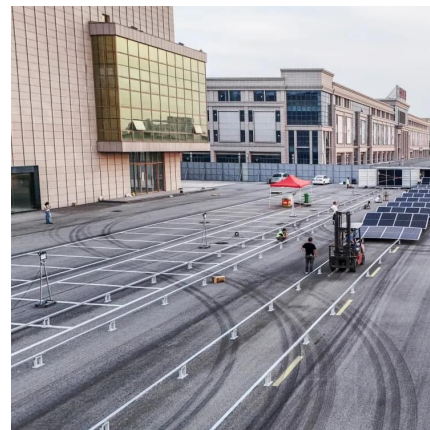

Mr Fröse, how long will it take for bidirectional charging with motor vehicles to become established in Switzerland? Volker Fröse: "First and foremost, it's important to ...
