

# Distributed solar panels in Finland

## Overview

---

Is solar power a real thing in Finland?

Many Finns are already familiar with solar power: solar panels can be found on the roofs of many homes, summer cottages and workplaces. As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition.

Why is industrial-scale solar power production becoming more common in Finland?

As technology develops, industrial-scale solar power production is also becoming more common in Finland. Finland is undergoing a major energy transition. Moving away from imported fossil fuels and towards local, clean energy production will create the basis for new industrial investment.

How solar energy is used in Finland?

Solar energy can be used in different forms. It can be used as a form of electricity or concentrated and stored in batteries or thermal sources. Finland is one of the avid users of solar-powered energy for different purposes. In this write-up, we share the biggest solar projects and farms in Finland.

Who are the best solar energy companies in Finland?

Fortum: Electricity company. Turn key solar energy systems. Full service chain from site assessment to system delivery and warranties. Green Energy Finland Oy: Turn key solution provider for renewable energy systems. Helen Oy: Electricity company. Construction and operating solar PV-plants.
