

# Distribution of inverters in solar container communication stations in Romania

## Overview

---

Does Romania have a solar PV project in 2023?

Overview of solar PV developments Following a period of lull, Romania has achieved in 2023 a significant milestone in its renewable energy journey - over 1 GW of new solar capacity installed in one year between distributed generation and utility scale projects.

Are solar panels a smart long-term investment in Romania?

With the scheduled removal of the energy price cap on April 1, more Romanians are turning to solar energy to reduce expenses and secure their energy supply. Rising electricity tariffs have further accelerated interest in renewable solutions, particularly in the residential sector, where solar panels are becoming a smart long-term investment.

Will Romania expand its photovoltaic sector in 2025?

Romania is set for a significant expansion in the photovoltaic sector in 2025, driven by funding programs such as Casa Verde and RePower EU, the liberalization of energy prices, and a growing interest among Romanians in achieving energy independence.

Is the Romanian solar market a good investment?

Overall, the Romanian market offers a unique opportunity for both domestic and international investors, and this guide aims to provide a clear picture of the potential in this field. Romania boasts an ideal climate for solar energy, with an average of 1,600 kWh/m<sup>2</sup> of solar irradiation annually.
