

Dublin Emergency Energy Storage Power Supply

Overview

Does ESB have a battery plant in Dublin?

ESB has officially opened a major battery plant at its Poolbeg site in Dublin, which will store excess renewable energy for discharge when needed. It said the facility will add 75MW of fast-acting energy storage to help provide grid stability.

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

How many MW of battery storage capacity are there in Ireland?

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.

Will battery storage help Ireland generate 80% renewable electricity by 2030?

Ireland has set a target of generating 80% renewable electricity by 2030. Deployment of battery storage will be capable of responding in milliseconds to frequency changes, importing or exporting electricity from the grid as needed, and helping efficiently stabilise the grid, while guaranteeing reliable electricity supply for users.

Dublin Emergency Energy Storage Power Supply
