

EK Outdoor Power 3 Waves in Johannesburg South Africa

Overview

Does South Africa have a wave energy potential?

A few studies have been conducted in the field of OWE for the South African sea state, to determine the potential of South African wave energy potential (Joubert and van Niekerk, 2013; Banks and Schäffler, 2005). South Africa could benefit from this energy along its coastline (Fourie and Johnson, 2017).

Does South Africa have a wave power plant?

In fact, South Africa has some of the biggest waves in the world for producing energy (Fourie and Johnson 2017). There were initiatives to deploy a 500 MW wave energy power plant in South Africa (ESI 2015).

Could South Africa benefit from marine wave energy?

This paper describes possibilities of marine wave energy along the coastline from which South Africa could benefit. South Africa has an extensive 2800 km coast-line (Joubert, 2008) with high wave energy potential (Banks and Schäffler 2005; Musango et al. 2011).

What is the energy potential of KwaZulu-Natal (KZN)?

KwaZulu-Natal (KZN) bounds on the east to the Indian Ocean. The wave energy potential of KZN increases from St Lucia Estuary to Port Edward, with an annual average power flux of 15 kW/m observed near the Durban (Fourie and Johnson, 2017). This wave energy potential is due to the Agulhas current along the Durban coast.
