

# EU Base Station Battery Project Tender

## Overview

---

What does the European Union funding call mean for battery cell manufacturing?

This funding call supports the development of battery cell manufacturing projects that align with the European Union's commitment to cutting CO<sub>2</sub> emissions, reducing dependence on imports, and fostering technological innovation.

What is the funding and tenders portal?

The Funding and Tenders Portal is the single entry point (the Single Electronic Data Interchange Area) for applicants, contractors and experts in funding programmes and procurements managed by the European Commission.

Are Li-ion batteries a threat to Europe's energy transition?

Li-ion batteries play a crucial role in Europe's energy transition, yet production dominance lies with China, Korea, and Japan. To counter this dependency, Europe plans to establish 25 new gigafactories amounting to EUR 35 billion by 2030. However, defects are anticipated to occur at rates ranging from 15 % to 30 % during the initial ramp-up phase.

How do I apply for EU funding and tenders?

Interested parties can submit proposals through the EU Funding and Tenders Portal, with the deadline set for early 2025. Applications will undergo a rigorous evaluation process, with final selections expected by mid-2025. For more details on eligibility and submission requirements, visit the EU Funding and Tenders Portal.
