

European Terrace Solar Power Generation System

Overview

How many balcony solar installations are there in Germany?

It is also highly portable, so it can easily be transported from one apartment to another if the owner moves. According to Grist, Germany now has more than 550,000 balcony solar installations, half of which were installed in 2023. During the first six months of 2024, Germany added 200 megawatts of balcony solar.

Why are balcony solar systems becoming more popular in Europe?

The rapid urbanization of Europe has been a key driver in the growth of balcony solar systems. With over 70% of Europeans living in urban areas, many in apartments, traditional rooftop solar installations are often not feasible.

Can a balcony Solar System be installed in Switzerland?

In Switzerland, balcony solar systems are treated as regular electrical devices. Systems up to 600 watts can be installed without special permission, though they must be registered with the local energy supplier. The Netherlands has a favorable environment for balcony solar, with systems up to 1000 watts allowed without special permits.

Does community solar work in Germany?

Community solar offers a partial solution for some, but it is not available everywhere. In Germany, more than 1.5 million people have installed Balkonkraftwerke, which translates as “balcony power plants.” Almost every apartment has a balcony with a railing to keep folks from tumbling into the street below.
