

# European and American solar panel orders

## Overview

---

How can Chinese solar panels overcome trade restrictions?

Chinese solar panel manufacturers aim to surmount the unprecedented trade restrictions they face in the U.S. and Europe using three key strategies: building factories directly in the U.S., building factories in new third-party markets and continuing direct exports where it makes financial sense to do so.

Will Britain be forced to stop using Chinese solar panels?

UK ministers said in April that Britain's state-owned energy company would be forced to make sure it doesn't use any solar panels linked to Chinese forced labour. In 2024, about a fifth of the world's polysilicon was produced in China's Xinjiang region, where western governments have alleged human rights abuses of the Uyghur community.

Will Chinese investors beat us solar panels in 2026?

By 2026, Chinese investors are projected to beat their U.S. counterparts in planning solar panel production capacity on American soil, according to the Institute for Energy Economics and Financial Analysis, a global think tank. Source: Institute for Energy Economics and Financial Analysis, BloombergNEF, JMK Research.

Are Chinese solar companies going overseas?

Although Chinese solar firms have "gone overseas" for over a decade, the headwinds are stronger this time. They are facing internal and external worries simultaneously, as several company chiefs stressed, referring to domestic oversupply and international restrictions.
