

Government Procurement of 350kW Photovoltaic Energy Storage Container

Overview

Berkeley Lab provided technical expertise and support to the U.S. General Services Administration (GSA) in executing the federal government's first ever joint solar power procurement. The project combi.

Can PV plus storage be deployed cost-effectively at grid-connected sites?

Considerations for Implementing PV Plus Storage Systems at Federal Buildings and Campuses – Recent declines in lithium-ion battery costs, along with changes in net metering policies and utility rate structures, have provided opportunities for PV plus storage to be deployed cost-effectively at grid-connected sites.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

Can solar photovoltaic systems survive a hurricane?

Solar Photovoltaic Systems in Hurricanes and Other Severe Weather – The U.S. Department of Energy Federal Energy Management Program is expanding its recommended design specifications to include factors and best practices for system survivability identified from 2017 hurricanes.
