What is a diyhz thermal circuit breaker?

Introducing the DIYhz Thermal Circuit Breaker, a reliable and efficient solution for your electrical needs. This circuit breaker is designed with a power rating of 30A, making it suitable for a wide range of applications. Whether you're working on automotive, industrial, or marine projects, this circuit breaker is perfect for you.

How does a type I thermal circuit breaker work?

A Type I thermal circuit breaker automatically resets or cycles after tripping from an overload, which causes the thermal mechanism to bend and open the circuit. The resetting occurs once the temperature cools, automatically closing the circuit.
