

How much does BESS solar panels cost in London

Overview

How much do solar panels cost in the UK?

The most common type of system is the 4kW solar system, which costs between £5,000 – £6,000. It can save the average household about £660 per year, provided that they have a decent number of sunlight hours and are installed on a south-facing roof. In 2025, the price of solar panels in the UK can vary depending on several factors.

Should you buy solar panels in London?

You can also cut your CO2 emissions by at least 12.5 tonnes over the course of your solar panels' lifespan – an 11% reduction in your carbon footprint. So it's absolutely worth buying solar panels in the capital, as long as you're a homeowner who can afford how much solar panels cost. How much sunlight does London receive?

.

What is solar together London?

Solar Together London is a group-buying scheme that makes accessing solar electricity cheaper for everyone involved – by 30-35%, on average. More than 3,000 homes have had solar panels installed through this scheme, which is the main way to get solar panels in London at a reduced price, thanks to the lack of grants.

How much does a photovoltaic system cost in the UK?

- A household in the UK installs a 5kW photovoltaic system costing £8000 (average cost), which would generate approximately 4320 kWh of electricity annually.
- The annual SEG income in the UK would be £324 per annum.
