

# How much does the energy storage charging pile equipment cost

## Overview

---

How much does a charging pile cost?

The price of charging piles varies greatly, ranging from hundreds to thousands of RMB, causing the price difference. The most important thing is the difference in power. The price of 11KW is about 3000 or more, the price of 7KW is 1500-2500, and 3.5 The portable price of KW is under 1500.

What is the difference between charging pile and charging stations?

1.Charging pile refers to a charging device with a charging gun and a human-machine interface, which is simply an electrical device that can be charged, either in one piece or in a split type.

How many watts can a charging pile charge?

The maximum charging power of the AC charging pile is 7KW, the charging power of the DC charging pile is generally 60KW to 80KW, and the input current of a single gun can reach 150A--200A, which is a huge test for the power supply line. In some old community, even one can't be installed there.

What is a public charging pile?

Public charging piles are purchased by public service organizations such as government for use by any electric vehicle owner, such as public parking lots.
