

How much is the electricity price of 5G base stations in Sao Tome and Principe

Overview

How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How much does SA 5G cost?

However, transitioning from non-standalone (NSA) 5G to SA 5G comes with a hefty price tag—between \$1 billion and \$3 billion per operator. Unlike NSA 5G, which relies on existing 4G infrastructure, SA 5G requires a brand-new core network. This includes cloud-based architecture, advanced data centers, and software-defined networking.

What is 5G cost Delta?

The second is the concept of '5G Cost Delta', or the change in the 5G-era TCO of a network component area versus 4G, which is the horizontal axis in Figure 1. We find that some network components (e.g. Energy) have a disproportionately larger 5G Cost Delta than others, and may require more attention as a result.

Which 5G-era network cost components have different 5G deltas?

Some 5G-era network cost components will have very different 5G Deltas within this approach: Energy is set to have the highest cost Delta range of up to 140% as a result of 5G-era RAN densification, 5G M-MIMO and mobile data traffic growth, as outlined in section 3.3.

How much is the electricity price of 5G base stations in Sao Tome and Principe?

[A technical look at 5G energy consumption and performance](#)

Energy consumption per unit of data (watt/bit) is much less for 5G than 4G, but power consumption is much higher. In the 5G era, the maximum energy consumption of a 64T64R active antenna unit (AAU) will ...
