# How to connect the power supply of the French base station

## Overview

---

How do I connect a base station to a network?

1. Connect the base station power and the network using method a or method b. a. AC Power Option b. PoE (Power over Ethernet) Option If you choose method a, use Yealink supplied power adapter (5V/0.6A). A third-party power adapter may damage the base station. If you choose method b, you do not need to connect the power adapter.

How do I set up a base station?

Set up the base station using either the tripod or T-bar mounting method. You must use an external radio antenna kit for the internal 450 MHz or 900 MHz radio. To avoid interference between the 900 MHz radio and GPRS transmissions, do not mount the external radio antenna within 1 m (3.3 ft) of the GSM antenna.

How does a base station unit emit radio frequency energy?

The base station unit described in this guide emits radio frequency energy through its antenna. Although the power level is low, concentrated energy from a directional antenna may pose a health hazard.

How many compartments does a BS4 base station have?

The BS4 base station has two weatherproof compartments for the functional components. The smaller left hand compartment contains the power connection, hazardous voltages and the unit power supply. This compartment should not be opened. Only a trained electrician should open this compartment.
