

Huawei Sunshine solar container battery Cell Model

Overview

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

Is Huawei launching a solar battery in 2021?

In 2021 Huawei has entered the residential solar battery market with their Luna2000 battery. The battery's lithium-iron phosphate cells have a modular design and can be scaled from 5kWh to 30kWh.

What is Huawei Luna S1 residential energy storage system?

Beyond the Huawei LUNA S1 residential energy storage system, the company's residential smart PV solution establishes an all-in-one home energy management system that provides users with a low-carbon lifestyle - transforming households from energy consumers to both consumers and producers.

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 kWh up to 15 kWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.
