

Huawei base station power supply changed to adjustable power supply

Overview

How to choose a power supply system for a communications station?

The power supply system should meet the needs of the communications station, and its cabling should be as simple as possible to facilitate operation and maintenance. The low-voltage AC power supply system should use 3-phase 5-wire or 1-phase 3-wire for power supply.

How to choose a power supply system?

The AC power supply system that consists of mains, uninterruptible power supply (UPS), and self-provided generators should supply power in centralized mode. The power supply system should meet the needs of the communications station, and its cabling should be as simple as possible to facilitate operation and maintenance.

What is Huawei PowerCube?

To address this situation, Huawei offers PowerCube, an industry-leading hybrid power supply solution. Built along the lines of a Micro-Grid Energy System (MGES), it comprises four elements – power generation, control, monitoring, and energy storage.

What if a power supply downgrade occurs on an AP?

If any of the following symptoms occurs, a power supply downgrade occurs on an AP: Warning: The required power supply mode for the device is 802.3BT90. The current power supply is insufficient (Limited), and some functions are limited. Check AP information on the AC. The ExtraInfo field is displayed as P. <HUAWEI> display ap all .
