Indonesia Off-Grid Solar Container with Ultra-Large Capacity

Overview

What is Indonesia's first & largest containerized battery energy storage system?

Indonesia's First & Largest Containerized Battery Energy Storage System. Off-grid solar energy system at PT Cipta Kridatama equipped with CBESS. The CBESS solar energy system at PT Cipta Kridatama Jambi operates off-grid, making it a reliable, self-sustaining energy source without dependence on the national electricity grid.

Will Indonesia deploy 100 GW of solar?

The Indonesian government has revealed a new initiative aiming to deploy 100 GW of solar. The distributed solar for energy self-sufficiency program encompasses 80 GW of solar that will be deployed as 1 MW solar arrays with 4 MWh of accompanying battery energy storage systems (BESS).

How much solar energy does Indonesia have?

The initiative is still under development, with Indonesia's Ministry of Energy and Mineral Resources, Coordinating Ministry of Economic Affairs and Coordinating Ministry of Food responsible for its preparation. IESR has estimated Indonesia has a potential solar energy capacity ranging from 3,300 GW to 20,000 GW.

Is energy storage a key enabler for Indonesia's solar energy progress?

This marked a significant contribution to Indonesia's renewable energy goals, positioning energy storage as a key enabler for the country's solar energy progress. As Southeast Asia's largest economy, Indonesia is experiencing a rapid rise in demand for solar energy.
