

Indonesia Surabaya solar glass exports increase significantly

Overview

Why is the Indonesia glass manufacturing market growing?

The Indonesia Glass Manufacturing Market, valued at USD 5.8 billion, is growing due to urbanization, construction boom, and demand for high-performance glass in automotive and consumer sectors. The Indonesia Glass Manufacturing Market is valued at USD 5.8 billion, based on a five-year historical analysis.

Could US tariffs threaten Indonesia's solar panel exports?

Indonesia's solar panel exports have soared in recent years, reaching record highs despite mounting trade pressure from the United States. Now, a petition filed by U.S. manufacturers could trigger new tariffs that threaten Indonesia's growing presence in the clean energy market.

Why is Indonesia sluggish on solar energy?

Despite the slow adoption of solar power at the national level, Indonesia's renewable energy sector is seeing an influx of investments, largely driven by government initiatives and international collaborations. Experts attribute the country's sluggish embrace of solar energy to its continued dependence on low-cost, coal-fired power generation.

Why is the solar PV glass market growing?

Government rules that are favorable to the development of solar PV plants is one of the factors driving the growth of the solar PV glass market. Additionally, the market for solar PV glass is growing due to the surge in demand for solar systems on a residential, commercial, and utility scale.
