

Indonesian solar Glass

Overview

What is glass products manufacturing in Indonesia?

Glass Products Manufacturing in Indonesia Manufacture glass products for household, laboratory and equipment for the pharmacy and health industries. It also consists of operators engaged in the manufacture of glass tubes, glass packaging and other glass products. Glass household product manufacturing.

Why is PV glass made in Indonesia?

As an offtaker of our PV-Glass-Grade Silica, the factory ensure a stable offtake and a secure supply chain for the silica refinery. Coupled with other raw materials like soda ash, alumina, limestone, and other coming from local sources, the resulting PV Glass contains almost 100% local content – eligible to earn the Made in Indonesia title.

Why is solar energy industry important in Indonesia?

It is the most important aspect for Solar Energy industry in Indonesia. As part of the integrated ecosystem, the facility enjoys cheap green source of energy. ADCORP is also committed to sustainability, utilizing eco-friendly materials and energy- efficient production methods to minimize environmental impact.

Why is TKDN important for solar energy industry in Indonesia?

It is a game changer, an enabler for the downstream PV Panel manufacturer to meet the Domestic Component Level (TKDN) regulation and its minimum requirement as stipulated by the Ministry of Energy and Mineral Resources and the Ministry of Industry. It is the most important aspect for Solar Energy industry in Indonesia.
