

# Is it damp in the house after installing solar panels

## Overview

---

Do solar panels work in wet conditions?

Myth: Solar panels don't work well in wet conditions. Fact: Solar panels can still generate electricity in cloudy or rainy conditions, albeit at reduced efficiency compared to sunny days. Monocrystalline and Polycrystalline Panels: Performance: Both types generally perform well in wet conditions if properly sealed.

What if I don't have enough roof area to install solar panels?

If you don't have enough roof area to install the required number of panels, there are still options open to you. You can install a ground-mounted solar panel system in the garden or opt for a partial system to provide a percentage of your electricity needs. Typically such systems provide up to 70% of a homes power requirements.

Can solar panels stop sunlight from hitting a house?

In one Victorian case, the City of Melbourne v Chen, a development was proposed that would have stopped sunlight from hitting an existing dwelling with 14 solar panels on the roof. Density can be a factor when courts consider matters about light access for solar panels.

What should I do after installing solar panels?

However, you still need to do some things after solar panel installation to make the most of your investment. These include: After installing solar panels, you must register your system with the Australian Small-scale Renewable Energy Scheme (SRES) administrator, the Clean Energy Regulator (CER).
