Is there any energy storage power station project in Honduras

Overview

Where is the electricity system concentrated in Honduras?

The national electricity system is concentrated in the western part of Honduras. In absolute terms, it is estimated that more than 386,000 households or more than 1.93 Million people in rural areas remain without access to electricity, with the sparsely populated eastern part remaining mainly beyond economic line-extension distances.

What is a 75 mw/300 MWh substation?

This 75 MW/300 MWh system will be installed at the Amarateca substation, located in central Honduras, to mitigate supply issues during peak demand periods. The tender invites national and international companies to submit sealed bids for the study, design, supply, installation, testing, and commissioning of the system.

Who owns Amarateca substation?

Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year after evaluation and award phases are completed, Carbajal said. The Amarateca substation belongs to the National Company Of Electric Energy (ENEE), the country's main utility.
