

Kazakhstan Energy Storage Container Telecommunication Power Supply 100KWh

Overview

Could Kazakhstan increase its wind power capacity by 2035?

4 Kazakhstan's vast and cost-efficient wind energy potential offers a particularly strong foundation for scaling up renewable energy capacity. The country could increase its wind power capacity to 10 gigawatts by 2035, twice as much as the government is currently planning – or even more.

What is Kazakhstan known for?

Kazakhstan is a significant producer of coal, crude oil and natural gas, and a major energy exporter. While coal dominates the country's energy mix, renewable sources of energy account for 9% of its electricity generation.

How big is Kazakhstan's Energy network slated for modernization?

“The volume of networks slated for modernization spans 80,000 kilometers—equivalent to two equators,” said Sergey Agafonov, the chairman of the Kazakhstan Association of Energy Supply Organizations, highlighting the project's scale.

How is energy used in Kazakhstan?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.
