

# Kenya Mombasa Energy Storage Power Supply Purchasing Site

## Overview

---

How is Kenya transforming its energy sector?

Kenya's energy sector is on the verge of undergoing a substantial transformation, with LNG import terminal, cross-border transmission system for NG supply, and new power plant.

What are the opportunities for utility scale battery energy storage systems?

There are opportunities for Utility Scale Battery Energy Storage Systems (BESS) Two thirds of Kenya's electricity is generated from renewable/clean energy sources. Of this, wind power accounts for 15% (435MW) while solar accounts for just under 2% of total installed capacity (51MW) with these numbers expected to continue to grow.

How will CCGT power plant work in Kenya?

Additionally, a CCGT power plant will be developed with total net capacity 2.800 MW in two phases of development. KenGen will secure its largest and longest African gas supply deal from Doha's massive production expansion project, providing Kenya with 3.2 million metric tons of Liquefied Natural Gas (LNG) a year for 12 years.

When will Mombasa LNG delivery start?

The long-term sales and purchase supply agreements for delivery to the Mombasa LNG receiving terminal with deliveries expected to start in 2028, directly after the CoD of the terminal.
