What is a lead acid battery?

These batteries are commonly used in vehicles, boats, and uninterruptible power supplies (UPS) to keep devices running smoothly during blackouts or emergencies. Ivent stocks a wide range of gel, AGM, VRLA and flooded batteries. These batteries are also referred to as acid batteries or simply lead batteries. But how does a lead acid battery work?

.

Are lead acid batteries a good choice?

With advancements in technology, lead acid batteries have become more efficient and durable than ever before. Whether you're looking to power an industrial application or keep your golf cart running smoothly, a lead acid battery is a reliable and cost-effective solution.

Are lead-acid batteries recycled?

Lead-acid batteries are one of the most recycled consumer products in the world. Around 99% of spent lead batteries in established systems are safely recycled. Globally, about 86% of total lead consumption goes into making lead-acid batteries, making them central to the global lead cycle.
