

Myanmar Grid Energy Storage Policy

Overview

What is the 2015 Myanmar energy master plan?

Tell us and we will take a look. The 2015 Myanmar Energy Master Plan is put forward by the Asian Development Bank and Myanmar Ministry of Energy in order to analyse energy demand development from 2014 to 2035 along five supply expansion scenarios.

Does Myanmar need a comprehensive energy plan?

Myanmar needs to establish a comprehensive integrated energy plan to guide the development of the energy sector, including an energy efficiency labelling programme for energy service companies and appliances.

Who manages Myanmar's energy sector?

Myanmar's energy sector is managed by the Ministry of Electric Power (MOEP) and the Ministry of Energy (MOE), which together account for over one-third of public sector revenue. Before May 2022, the two ministries operated under one single Ministry of Electricity and Energy (MOEE).

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.
