

Netherlands Energy Storage Explosion-proof Container

Overview

How do I choose a container for explosion-safe storage?

The containers offer ease of placement and relocation, allowing flexibility for your storage site. To find out how these units can be customized and receive a pricing estimate, simply request a quote. In Summary: Choose from 10 ft or 20 ft containers for explosion-safe storage suitable for offshore.

Are ATEX containers safe?

Practical Information: Our ATEX Units are compact yet prioritize safety, making them ideal for space-constrained offshore locations. Both the 10 ft and 20 ft models are constructed for durability, ensuring longevity even in demanding conditions. The containers offer ease of placement and relocation, allowing flexibility for your storage site.

How much vent gas does an ISO container deflagration system produce?

of 28.7 m², or again, 99% of the available 28.8 m² roof area. To bring these figures into perspective, for the 130 Ah capacity cells which produce the average 154 L of vent gas each, 6.9 cells will produce the volume of vent gas that maxes out the capabilities of the 8-ft ISO container deflagration protection system, with th.

Are ATEX offshore storage units reliable?

Choose from 10 or 20 ft models, with reliable features by Cobic-Ex and Ex-Machinery. For those in need of dependable storage solutions for hazardous materials on offshore sites, the ATEX Offshore Storage Units present a practical and secure option. Made by Netherlands-based manufacturer VMCR Solutions.
