# New Zealand Auckland solar container lithium battery bms development

## Overview

---

Which energy company is building New Zealand's first grid-connected battery energy storage system?

Meridian Energy is building New Zealand's first large-scale grid-connected battery energy storage system (BESS) at Ruakākā on North Island Paris, January 10, 2023 - Saft, a subsidiary of TotalEnergies, has been awarded a major contract by Meridian Energy to construct New Zealand's first large-scale grid-connected BESS.

What are ESS batteries & how do they work in New Zealand?

They are the most common new form of ESS connecting to New Zealand's power system. The cost of BESSs has fallen over the past several years, and they are now more prevalent, in the form of either electric vehicle batteries or stationary batteries.

What is a battery management system (BMS)?

Most BMS units include passive balancing to ensure optimal cell performance. In essence, BMS units are sophisticated electronic systems designed to maximize battery safety and longevity. They provide features that traditional battery technologies lack, ensuring your lithium battery operates safely and efficiently over its lifespan.

What types of batteries are used in New Zealand?

The most common forms in use in New Zealand are electric vehicle batteries and stationary batteries integrated with rooftop solar installations. 2.17. Consumers with small-scale BESSs have the opportunity to be active participants in the power system.

## New Zealand Auckland solar container lithium battery bms development

### [New Zealand finishes build of 100 MW / 200 MWh battery ...](#)

Construction of the Meridian Energy 's Ruakaka BESS is now complete, adding a significant boost to the New Zealand grid. The 100 MW / 200 MWh Ruakaka BESS, located in the Ruakaka Energy Park, 130 ...
