

# Nickel Energy Storage Export

## Overview

---

Why did Indonesia halt the export of nickel ore?

Indonesia's 2020 decision to halt the export of nickel ore is a continuation of its industrial policy to produce downstream materials and products in the nickel and EV battery supply chain. In 2014, Indonesia successfully employed a similar export ban to develop downstream value-added nickel products for the stainless-steel supply chain.

Does Indonesia have a nickel export ban?

In 2014, Indonesia successfully employed a similar export ban to develop downstream value-added nickel products for the stainless-steel supply chain. Aided by China's large demand for stainless steel, Indonesia created a well-developed intermediate nickel product and stainless-steel industry.

Is Indonesia the world's biggest producer of nickel?

Melissa Lott: Indonesia has been the world's biggest producer of nickel for a lot of years. And in the past, the country would ship most of its ore to China where it would be made in a stainless steel. But with rising demand for lithium-ion batteries, Indonesia saw an opportunity to be an even bigger player in nickel supply chains.

What are the environmental impacts of the nickel industry?

But there are some who see the environmental impacts of the nickel industry and disagree. Imam Shofwan: There [is] a lot of massive deforestation and people lost their source of living around the nickel mining areas. Melissa Lott:
