

Norway has battery replacement cabinets

Overview

What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Why should we invest in EV battery recycling in Norway?

Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape. Upon installation at the EV battery recycling facility, Hydrovolt, it will play a pivotal role in optimizing energy utilization and unlocking new revenue streams.

Can Norway become a global leader in the battery industry?

According to international experts, Norway has everything it takes to become a global leader in the battery industry. No other new, green industry can create as much welfare. The setting is quite similar to how Norway built global leadership from scratch in the oil business. Sign up with your email address to receive news and updates.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.
