

Off-grid procurement contract for foldable containers used in environmental protection projects

Overview

What are the new procurement rules?

The new rules seek to ensure greater inclusion of common societal goals in the procurement process. These goals include environmental protection, social responsibility, innovation, combating climate change, employment, public health and other social and environmental considerations.

What is the Sustainable procurement guide?

The Sustainable Procurement Guide provides the steps for embedding environmental sustainability within all government procurements. It is designed for officials in non-corporate Commonwealth entities and prescribed corporate Commonwealth entities listed in s30 of the Public Governance, Performance and Accountability Rule 2014.

What is the role of green procurement in sustainability?

One example of the role of green procurement in sustainability is the adoption of renewable energy sources. When organizations prioritize suppliers who use renewable energy in their production processes, they contribute to reducing greenhouse gas emissions and promoting a cleaner energy future.

What is the environmentally sustainable procurement policy?

That is why we have introduced the Environmentally Sustainable Procurement Policy, which takes effect in two stages from 1 July 2024 and 1 July 2025. Sustainable procurement policies give businesses the confidence they need to make their products and services more sustainable, knowing there will be the demand to sustain it.
