Outdoor solar AC combiner box

Overview

What is a solar power combiner box?

A solar power combiner box is a device that combines the output of multiple strings of solar panels for connection to the inverter. This reduces the number of wires that need to go to the inverter. Multiple strings of solar panels are also combined together in parallel to produce higher output currents.

What is a PV AC combiner box?

The new PV AC combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC. The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet.

What is LX-AC photovoltaic AC combiner box?

LX-AC photovoltaic AC combiner box is an important component suitable for series photovoltaic power generation systems, which is used to connect series inverters with AC distribution cabinets or step-up transformers. The incoming line of this combiner box uses a circuit breaker input, and the output uses a circuit breaker or load isolation switch.

What is an AC combination box?

The AC Combiner Box is a critical protection and distribution device in photovoltaic (PV) string inverter systems. It connects multiple PV string inverters to the main AC power grid safely and efficiently. Designed to meet the demands of outdoor installations, it offers IP65 protection, ensuring durability in harsh environmental conditions.

Outdoor solar AC combiner box

PV AC combiner boxes

For solar installations in the PV industry, reliability and availability are paramount. In systems with string inverters, our AC combiner boxes provide optimal short-circuit and overvoltage protection. Furthermore, each string ...
