Palau solar Power Station Generator

Overview

How will solar energy be produced in Palau?

Solar electricity will be produced by a hybrid 15.3 MWdc (13.2 MWac) solar photovoltaic (PV) plus 10.2 MWac/12.9 MWh battery energy storage system facility. Extensive safeguards to protect Palau's pristine environment SPEC did not leave any stone unturned to protect the pristine Palau ecosystem.

How many diesel generators are there in Palau?

For this study, it was assumed that the total diesel generation capacity of Palau's current power system is 20 MW (the four largest generators present in Palau). Table 2 shows in more detail the generation capacity for each power plant currently present in the country. Source: PPUC and PEA data (n.d.).

Does Palau have a solar PV system?

The model included large amounts of diesel generation, with a minimal share of renewable energy coming from the solar PV systems currently present in Palau.

Does Palau rely on fossil fuels?

As a small island developing state, the Republic of Palau sought to wean itself off its dependence on fossil fuel for power, which accounts for 99.7% of the country's power generation. To address this issue, Palau invited Solar Pacific Energy Corporation (SPEC), Alternergy's solar developer, to develop a clean, renewable energy source.

Palau solar Power Station Generator

Palau solar setup

What is a solar PV project in Palau? % share by 2025. The project's total investment of USD 29 million contributes to Palau's energy independence, clean power generation, carbon emissions ...
