

Philippines battery cabinet integrated system

Overview

Can battery energy storage systems be deployed in the Philippines?

In the Philippines, battery energy storage systems are still in their nascent stages. While policies like the inclusion of Integrated Renewable Energy and Energy Storage Systems (IRESS) in national auction programs have been put in place, actual deployment faces significant hurdles.

What is Masinloc battery energy storage?

The Masinloc Battery Energy Storage System (BESS) is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. We started our venture into battery energy storage technology in 2018 when we acquired this 10 MW system from AES Philippines.

Is the Philippines integrating energy storage into its energy mix?

She highlighted the country's existing large-scale pumped hydro facility and a target of 1.1 GW for IRESS deployment through the Green Energy Auction Program, showcasing the Philippines' dedication to integrating energy storage into its energy mix.

Why is battery storage important in Southeast Asia?

With energy demand soaring in the region, battery storage is a crucial technology for ensuring stable, reliable, and clean power systems." Kitty Bu, Vice President, Southeast Asia at GEAPP, echoed this sentiment, highlighting the dual nature of rapid renewable growth. "It's both a remarkable achievement and a significant challenge," she noted.
